### **Temporary Road Closure and Restrictions – Small Structure Replacement Culvert 86 (Ralston Ave) and 102 (Rolling Springs Drive), Project #15-09**

A small structure culvert replacement project is anticipated to begin on Ralston Avenue starting on or after April 18, 2016. At that time, there will be short duration traffic stoppages for both north/southbound traffic while certain work functions are performed. These stoppages could be as long as 30 minutes.

On or after April 25, 2016, the northbound lane of Ralston Avenue will be closed and traffic will share the southbound lane while the east side of the culvert is reconstructed. Once completed with the east side, the maintenance of traffic pattern will shift and traffic will share the northbound lanes while the west side is completed.

It is anticipated that construction will continue through June.

## **09-25-2015 – UPDATED**

### **Lane Restrictions – Illinois Street Extension, Project #10-10**

On September 4, 2015 the Illinois Street and 106th Street roundabout opened to traffic. The new alignment of Illinois Street south of 106th Street replaced the existing tee intersection which will be closed permanently and removed.

The new St. Vincent's Heart Hospital drives will be accessible only from the new Illinois Street alignment.

As work continues in the medians, islands and sides of the roadways, please anticipate lane restrictions. There may be daytime hours where one of the lanes is closed for equipment and personnel to achieve final completion. In addition, these lane restrictions could vary in length and location. Please be aware of this as you navigate the area.

## **04-07-2016 – UPDATED**

### **Lane Restrictions – Main Street and Keystone Parkway Landscaping, Project #15-10**

Installation of new lighting, landscaping and a decorative stone wall will begin Monday, September 28, 2015 at the roundabout interchange of Main Street and Keystone Parkway. The project will transform the hardscape portion of the interchange.

The Main and Keystone project will be completed in two phases. Phase one began Monday, September 28, 2015. This phase will include building a decorative stone wall within the center island on each side of Keystone Parkway. The pattern will be an ascending wall in the shape of a Fibonacci curve, with a decorative urn sitting atop a pillar. Phase two will take place this spring when final plantings of flowers will be done both inside the center island and along the outer edges of the interchange. Please anticipate lane restrictions as necessary during both phases of construction.
